

# Product planner App

---

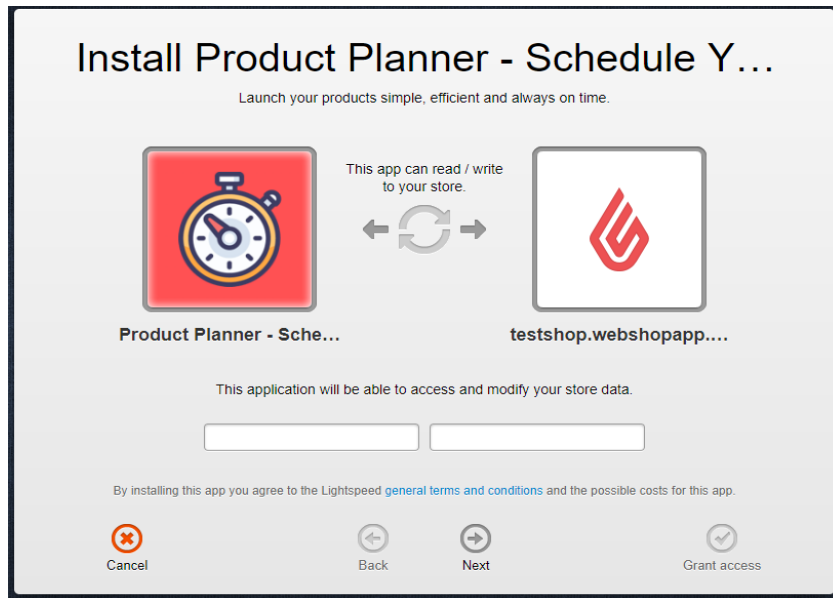

**CM** **DC**

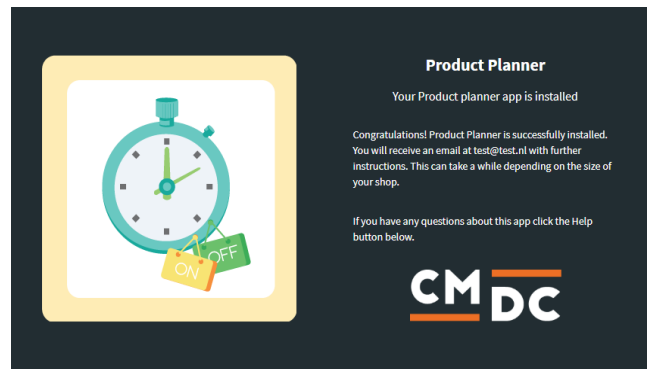

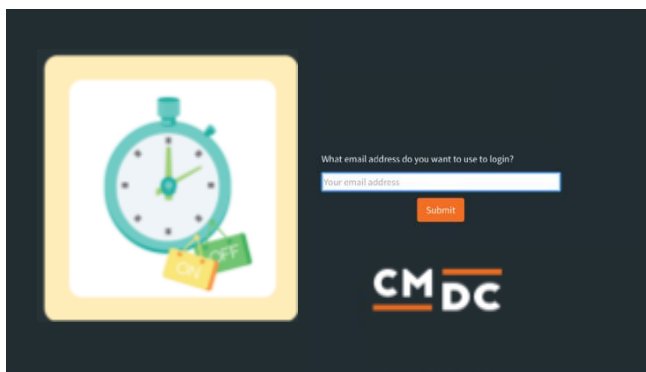

## Step 1. Installing the Product planner APP

Search the Appstore for the app.

If you want to install the app, click on the "install" button and follow the guided installation steps.

When the app is installed, you'll be redirected to the page shown below, where you can enter the e-mail address of the user that will use the app. As soon as you've entered your email address, we'll continue the installation process in the background and we'll let you know when the installation is done. If it's your first app by CMDC, we'll also include your password in the confirmation email.

NOTE: Depending on the amount of products you have in your shop, it might take several minutes for the email to be send.

For questions you can contact us  
Via: [info@cmdc.eu](mailto:info@cmdc.eu)  
Or ask your question via the "Help" button.

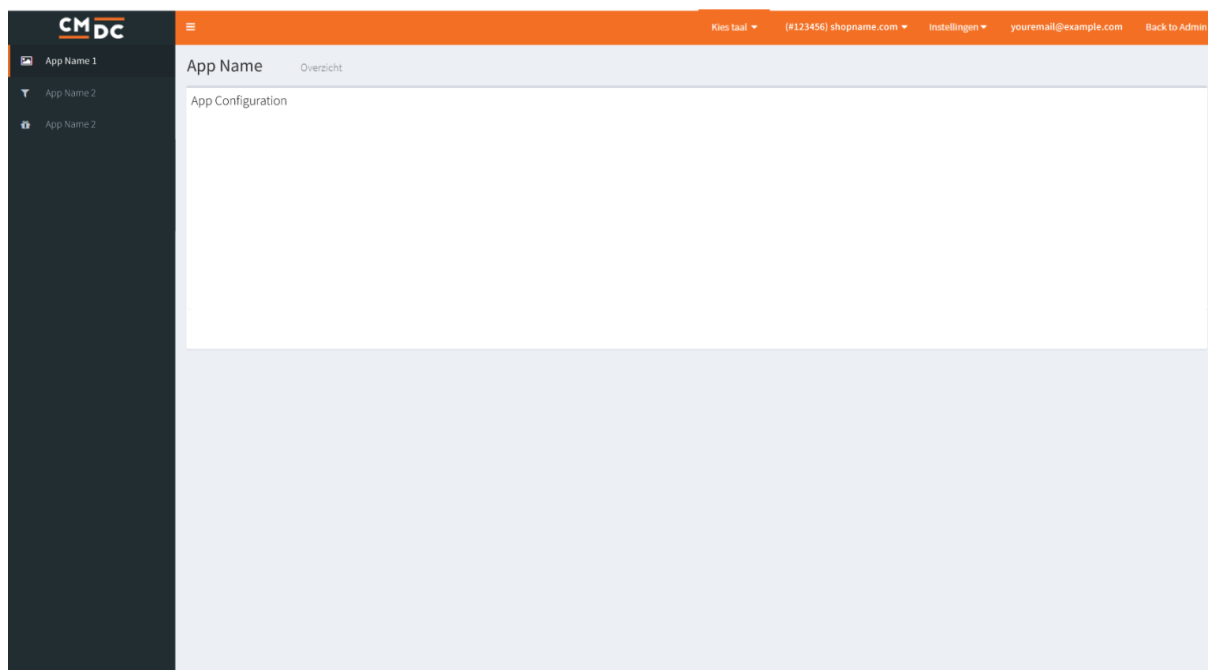

## Step 2. The APP framework from CMDC

Welcome to the CMDC appframework.

CMDC has created a framework, where you'll be able to configure all the apps that are made by CMDC, which you have installed. After installing the app from Lightspeed, you'll receive an email with your password on the email address you've supplied.

Every next app of CMDC you install, while using the same email address, will be added to your menu. You'll still receive an e-mail when the installation is complete, but you'll be able to login with your same login details.

Do you own multiple shops? No problem, you can still add all the apps to the different stores using the same email address. You'll then be able to switch shop and language. By clicking on your email address you'll be able to change your password.

Or ask your question via the "Help" button.

### Step 3. Adding and customizing the Product planner APP

1. Choose '**Product planner**' in the menu on the left
2. Choose a "**product**", "**categorie**" or "**brand**" to add a new sale schedule for a product
3. Start typing the name of your product, category or brand that you want to put into a sale in the product-field

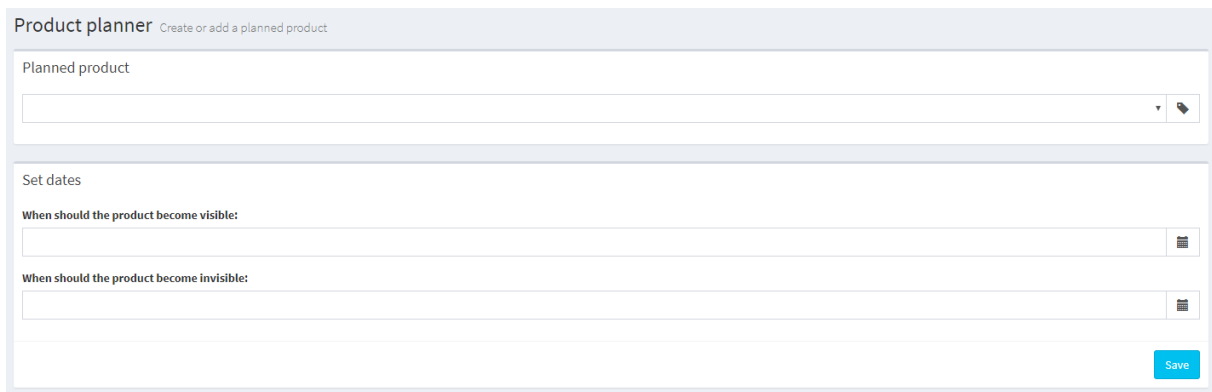

**Note:** All the product added to the brand or categorie will be visible/invisible. Even when the product is in more categories at once.

4. Choose the product from the autocomplete list
5. Choose when to make the product visible in "**When should the product become visible**"
7. Choose when to make the product invisible "**When should the product become invisible**"
8. Click "**Save**" to save your changes

*NOTE: Step 7 is optional.*

The schedule has now been created!

You can repeat this process for any other products you want to schedule.

The screenshot shows the 'Product planner' interface. At the top, it says 'Product planner' followed by a subtitle 'Create or add a planned product'. Below this is a section titled 'Planned product' with a text input field and a search icon. The next section is 'Set dates', which contains two date pickers: 'When should the product become visible:' and 'When should the product become invisible:'. At the bottom right of the form is a blue 'Save' button.
